

LastPass Families as a Benefit

Strong password habits at home
translate to better hygiene at work.

Employee benefits just got better – and bigger!

Provide a best-in-class password manager as a perk for your employees **and** their family, with LastPass Business – at no additional cost to you or your employees.

With professional and personal lives merging at an unprecedented rate, it is crucial that your employees are empowered to keep information easily accessible and completely secure across personal and business devices and applications.

Personal habits make an impact:

Encourage proper password hygiene personally, and you'll reap the benefits professionally. Individuals admit that they protect their work accounts at a lower rate than their personal accounts. And they use bad habits in both instances. When 91% of people know using variations of the same password is risky but 66% still do it anyway - you've got a problem to solve!

Granting a personal LastPass account with a secure vault to generate, store, manage, and share sensitive credentials and information, leaves no room for poor password management.

Increase employee adoption:

When 85% of breaches involve a human element, it becomes absolutely critical to ensure you secure every access point to your business, especially now that employees may be remote.

Take control of your business' data and enable your employees to do the same. Rest easy knowing your employees are practicing the same safe habits at home, increasing familiarity with proper password hygiene through LastPass, and ultimately drive better utilization, adoption, and engagement at work.

Two private vaults – one location:

When it comes to security, there's no compromise. No one knows your business' or employee's passwords with LastPass' zero-knowledge security model. Your business' data will never be accessible to your employee's family members. Ever.

Similarly, your business will never be able to access your employee's personal data or their family member's data. LastPass Business and LastPass Families – or any Personal LastPass account, are always kept private.

Empower your Employees:

In addition to LastPass Business, with LastPass Families, your employees can:

Invite Family and Friends	However you define family, we've got you covered. Invite up to 5 additional family members or friends to join their LastPass Families account.
Private Vaults	Each family member is granted their own unique LastPass account where they can store personal passwords and specify those meant for sharing with others, while keeping the rest private. Linking an account will not merge personal and professional data.
Holistic Protection	Store and protect their entire family's passwords across all devices , while creating a digital contingency plan for their family's most important digital assets.
Unlimited Sharing	Share passwords with one-to-one or one-to-many sharing capabilities, with unlimited shared folders.
Review Security Strength	Increase password hygiene by using the security dashboard to clearly see what passwords need updating based on the password strength score.
Dark Web Monitoring	Receive alerts when data is compromised through 24/7 dark web monitoring – similarly, family members will get notified, too!
Premium Support	Employee's have direct access to basic and personal LastPass support. They can access our 24/7 Support Center with self-help resources and the LastPass Community - monitored by LastPass Specialists. If they need more help, they can email support and speak with our customer care team!
